# RUG PLACEMENT

**These instructions must be followed to retain Manufacturer's Warranties.**

## RUG PLACEMENT

Your tretford Rug/s will arrive rolled on a core, which can cause the ends to curl whilst in transit. To speed up the settling process, reverse roll the affected area/s in the opposite direction of the curling.

Please allow your tretford Rug/s to acclimatise for 24 – 48 hours after arrival before placing any furniture on top. It is preferable that the rug is laid flat for this period, however where restricted with space, unwrap from packaging and allow to acclimatise in the room where it will be situated before rolling out.

If you have concerns, please contact us at [rugs@gibbongroup.com.au](mailto:rugs@gibbongroup.com.au).

## NON-SLIP BACKING OR GRIPPER TAPE

Each rug is backed using a recycled PET Felt Backing and have the option of anti-slip properties for rugs under 6 square metres (e.g. 2 x 2.5m or under).

Rugs over 6 square metres (e.g. 2 x 3m or over) will not have anti-slip backing properties due to the rug being heavy enough to prevent movement or slippage as well as the difficulty in applying this in our production process.

## ROTATION & MAINTENANCE

Rotating your rug often will allow the normal wear to be more evenly distributed and will also help to minimise colour changes that may occur from exposure to direct sunlight.

Attention to ongoing maintenance will help prevent potential for insect damage in areas where dark / hidden areas can be missed in vacuuming (see [Care & Maintenance guide](#) for further details).
