CORE

Artcore Collection

— Think wildly. Blend naturally.

INTRODUCING ARTCORE

INSPIRED BY NATURE

Artcore is inspired by the **transitions seen in nature** – the space between two states, where a material or an environment changes from one thing to another.

- The way a forest turns into a meadow.
- The way the city gives way to the country.
- The boundary where tree bark becomes covered in moss.

ARTCORE COLLECTION

CORE

Acting as the **foundation** of the Artcore collection, **Core** brings a raw but steady rhythm to your floorscape.

Core is a one-of-a-kind **organic pattern** with its own **unique biophilic ambience**

INTRODUCING CORE

CORE offers an opportunity to create **unique patterned transitions** that **reconnect us with nature**, restoring **balance and wellbeing**.

Inspired by these natural transitions and the concept of **biophilic design**, **THREE DESIGNS** have transitions that play with CORE:

Mezzo, Litho & Etch.

ETCH

MEZZO

LITHO

ARTCORE TRANSITIONS

PATTERNED TRANSITIONS

Combine the 4 distinctive patterns of the Artcore collection to make **original and creative floor collages**.

Core acts as the **foundation** of your design. **Mezzo, Litho and Etch** have expressive patterns that sets the overall mood of the interior.

Beautiful blending together is achieved using the **gradient tile**: Mezzo Gradient, Litho Gradient or Etch Gradient.

ARTCORE COLLECTIONS

CORE with ETCH

To create a fluid pattern that moves smoothly from one side of a room to another - make a **transition** from Core to Etch with the Etch Gradient tile.

ARTCORE COLLECTIONS

CORE,
with
LITHO

Litho gives an urban and structured look to your interior.

Add tranquility to your design by making a transition from **Core** – the basic design of the Artcore collection – to Litho with **Litho Gradient**.

ARTCORE COLLECTIONS

CORE, with MEZZO

Rooted in the philosophy of **biophilia**, **Mezzo** features a **calming organic pattern** that reconnects us to nature.

Mezzo enables you to create smooth pattern transitions to the raw and linear design of **Core with the Mezzo Gradient tile**.

ARTCORE WELLBEING

COMFORT

CORE helps to mitigate the effects of noise disturbance, when used in combination with our **comfortBack^{eco}** backing,

With an average improvement of 65% in impact sound absorption and 25% in absorbing noise from adjacent spaces, **comfortBack^{eco}** makes spaces **calmer and quieter**.

ARTCORE SUSTAINABILITY

THE GOLD STANDARD

The entire Artcore collection is **Cradle to Cradle Certified® Gold**, keeping with modulyss' ambition to be at the forefront of sustainability.

To maximise our contribution to the circular economy, we do this by keeping our materials in use for as long as possible thereby minimising waste.

ARTCORE SUSTAINABILITY

A FIBRE FOR THE FUTURE

The Artcore collection is made from **100% regenerated ECONYL® nylon yarn.**

Artcore tiles are lined with **ecoBack** or **comfortBack^{eco}**, our 100% recyclable, Cradle to Cradle Certified® Gold backings.

Both backings are designed for the circular economy and can easily be disassembled and recycled into new backing solutions.
