

# comfortBack<sup>eco</sup>

sustainable carpet  
tile backing

It's a match with the future,  
great acoustics and your comfort.

# SWIPE ~~LEFT,~~ SWIPE RIGHT.

Yes, it's a match.

## Meet **comfortBack<sup>eco</sup>.** The best of both worlds.

You want to improve wellbeing and acoustics within your space, while also keeping your floor covering in (re)use as long as possible? Then we have developed the perfect solution for you: **comfortBack<sup>eco</sup>.**

This innovative 'all-in-one' carpet tile backing combines the shock-absorbing and noise reducing properties of **comfortBack** with the ecological and circular benefits of **ecoBack**. Plus: it can be equipped on a vast range of our carpet tiles.

# It's a match with *the future.*

There's no back-up for our planet. That's why we create backings that are as sustainable as can be. **comfortBack<sup>eco</sup>** consists of 62% recycled material and is absolutely free of PVC and bitumen. Furthermore, this backing weighs 27% less than **comfortBack**, reducing CO<sub>2</sub> and particulate matter emissions and fuel consumption during transport.

At the end of their long life, **comfortBack<sup>eco</sup>** equipped carpet tiles can be disassembled and recycled into a new backing, thereby contributing to the circular economy. **comfortBack<sup>eco</sup>** is a **Cradle to Cradle Gold Certified<sup>®</sup>** acoustic carpet tile backing. Last but not least: carbon neutral status can also be secured through the modulyss CO<sub>2</sub>RE initiative.

**100%**  
PVC- and bitumen-free

**-18%**  
CO<sub>2</sub> emissions

A serene landscape featuring a calm lake in the foreground with a small wooden boat. In the background, there are misty mountains under a soft, hazy sky. The overall mood is peaceful and quiet.

**+65%**  
sound absorption

**+25%**  
impact noise reduction

**It's a match**   
with *great*  
*acoustics.*

Noise is a well-known disruptor of concentration and productivity and often a source of irritation too. **comfortBack<sup>eco</sup>** is equipped with a dense felt layer, that makes spaces quieter. A lot quieter: compared to ecoBack equipped carpet tiles, **comfortBack<sup>eco</sup>** provides an average improvement of 65% in sound absorption and an average improvement of 25% in absorbing noise from adjacent spaces, known as the impact noise rating. But why don't you try and rate for yourself?

# It's a match <sup>WM</sup> with *your* *comfort.*

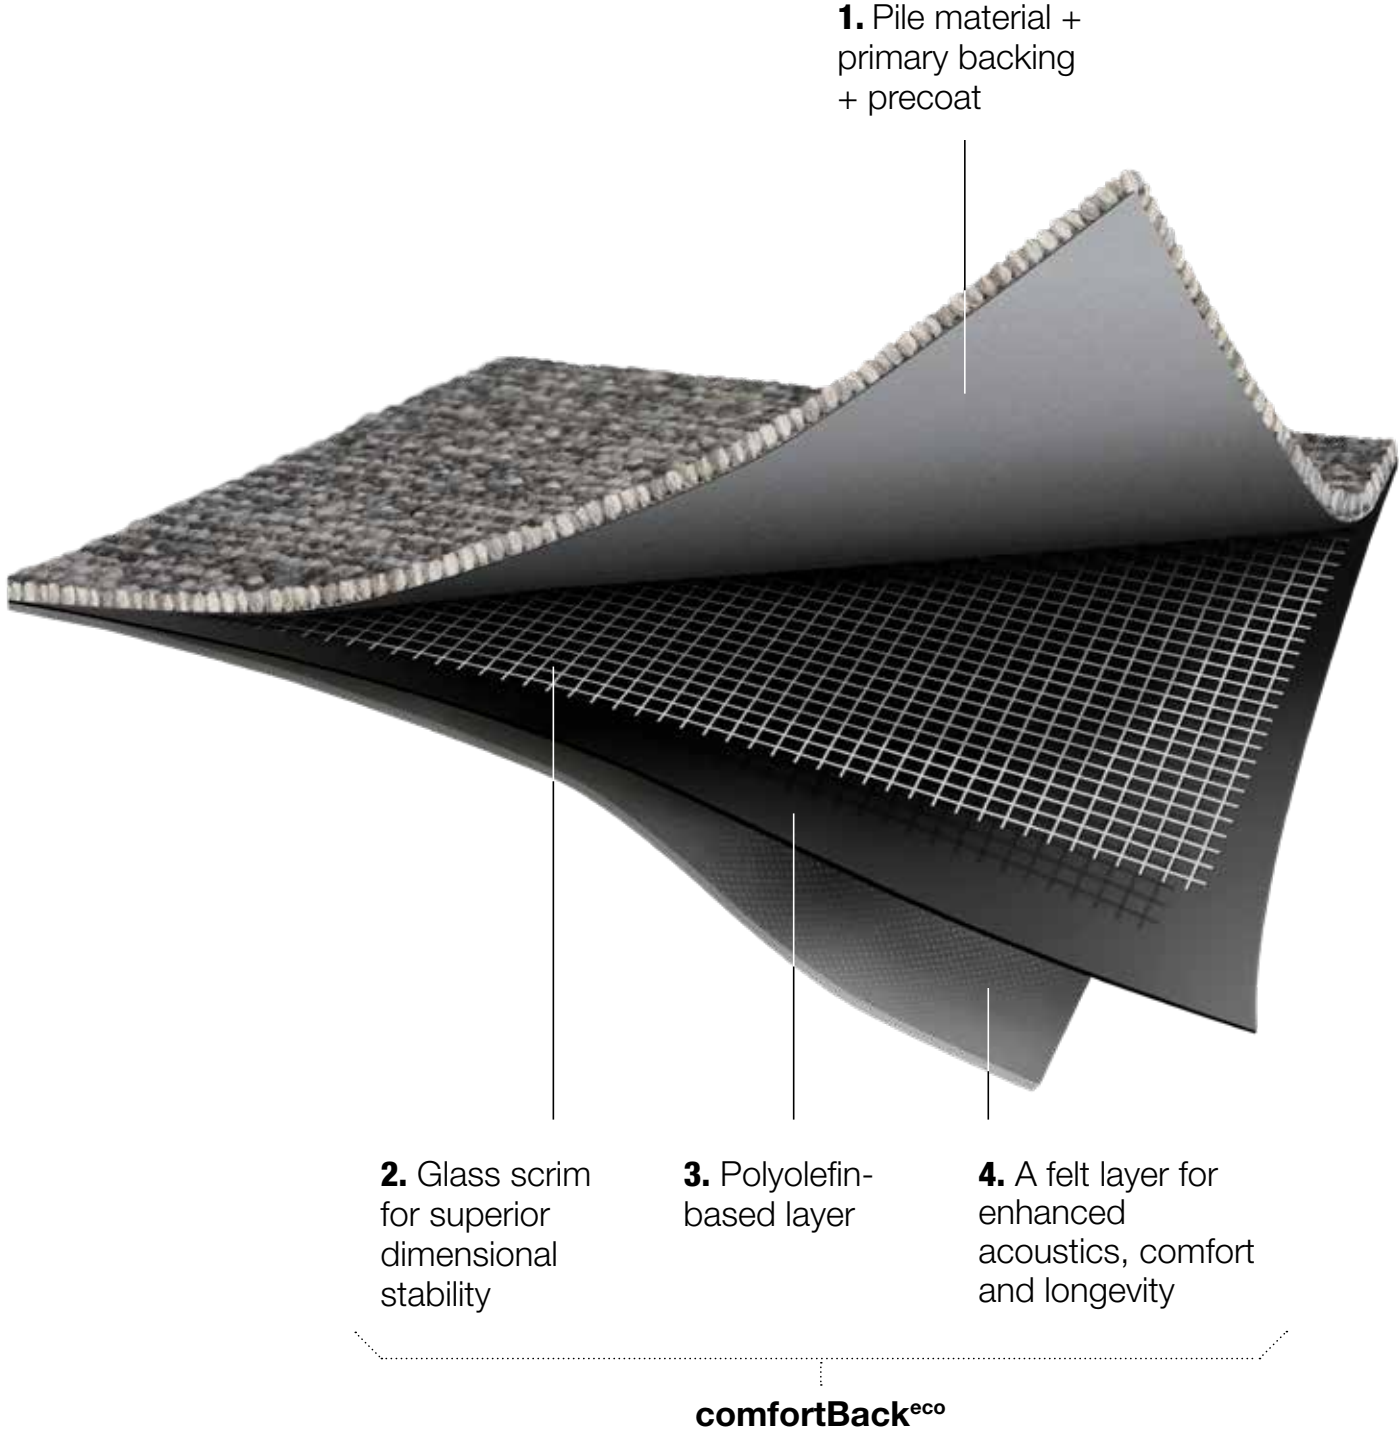

**comfortBack<sup>eco</sup>** increases underfoot comfort and improves wellbeing. The recycled polyester felt layer reduces muscle fatigue, ensures cushioning and makes sure your floor feels comfortable. It's lightweight, yet dense enough to absorb and recover from footfall time and time again. A small step for us, a very comfortable one for you.

**maximal**  
underfoot comfort

**minimal**  
muscle pain

**better**  
wear resistance

# What you don't see is what you get.

**A carpet tile with comfortBack<sup>eco</sup> consists of 4 layers.**

comfortBack<sup>eco</sup> can be equipped on a vast range of our tiles. Contact your local modulyss sales representative for more information.

**Let's make comfortBack<sup>eco</sup>  
a match with you.**
